SUMMARY

Senior full-stack engineer with 5+ years building production web and mobile applications for clients in energy, dating, real-estate, fitness and realtime communication. Daily stack: TypeScript, Next.js/React, Node.js, PostgreSQL — with production experience in Angular, Python, LLM/RAG integration, Docker, CI/CD and AWS (EC2, S3). I own delivery end to end — scoping, architecture, deployment, support — including technical-lead roles on client projects. I build with AI coding assistants daily — Claude Code and Cursor, for implementation, refactoring, tests and review. Currently independent via my own company; looking for a full-time product role (remote or Niš) — client work winds down on hire, no conflict.

EXPERIENCE

Founder & Senior Software Engineer — AURA DIGITAL LAB LLC

Casper, Wyoming, US (remote from Serbia) · May 2026 – Present

- Full-stack product engineering: Next.js/React + Node + PostgreSQL, multi-tenant data models, authentication, Stripe billing, admin surfaces.
- Sparkle realtime chat — real-time messaging product, Next.js front end and back end.
- AI feature integration: RAG support chatbot answering from a client's own docs and tickets, with permission checks; retrieval pipeline, prompt design, eval loop, deployment.
- Full production ownership: architecture, CI/CD (GitHub Actions, Docker), AWS deployments (EC2 servers, S3), monitoring and support.

Senior Software Engineer — KODIRO DIGITAL DOO (formerly Trinity Solutions)

Niš, Serbia · February 2023 – August 2026

- Technical lead on the dating applications (Next.js) and solar monitoring platforms — scoping, architecture, and delivery to production.
- Solar power plant monitoring platforms (Angular) used by operations teams; APIs, SQL data models, ingestion of production/consumption telemetry from device documents and exports (Kostal, Fronius); CI/CD pipelines.
- Docker-based deployments and cloud infrastructure across projects.

Software Engineer — NAISSUS TEHNOLOGIJE DOO

Niš, Serbia · June 2021 – February 2023

- GOATNESS fitness platform (GOAT Factory Group, Sweden) — trainer platform; mobile apps in Ionic + Capacitor (Angular), plus the building access-control backend.
- Real-estate broker portal for T|F Agency (Sweden) — mobile apps in Ionic + Capacitor (Angular) and .NET services; Microsoft SQL Server data models.
- Azure hosting with Azure DevOps release pipelines (web + mobile builds); SQL and DevOps across all projects.

SELECTED WORK

- AI support chatbot (RAG) — answers from company docs + ticket history (Python, OpenAI API, pgvector), embedded in web app and Slack.
- Solar monitoring platform — Angular operations dashboards, APIs and SQL models, CI/CD and cloud deploys.
- Real-estate broker portal (T|F Agency, Sweden) — web portal + mobile apps, SQL-backed, shipped to production.

SKILLS

TypeScript / JavaScript · React · Next.js · Angular · Ionic / Capacitor · Node.js · Python · PostgreSQL / SQL · Microsoft SQL Server · MongoDB (basics, academic projects) · REST APIs and integrations · LLM / RAG integration (OpenAI API) · Stripe billing · DDD (bounded contexts, aggregates, domain events) · Docker · CI/CD (GitHub Actions, Azure DevOps) · AI-assisted development (Claude Code, Cursor) · AWS (EC2, S3) · Azure

EDUCATION

Visoka tehnička škola strukovnih studija, Niš — Modern Computer Technologies, 2017 – (unfinished, no degree)

Tehnička škola "12. februar", Niš — Road Traffic Technician, 2013 – 2017

LANGUAGES

English (fluent) · Serbian (native)
